ABOUT

Experienced in software testing with hands-on exposure to manual and automation practices. Designed and executed **500+ test cases** across functional, regression, and API testing. Developed Playwright automation scripts and built a QA platform (QA360) with React and Node.js, including deployment and integration. Skilled in API testing using Postman, database validation with SQL, defect tracking, and familiar with Git and CI/CD concepts.

EDUCATION

Degree / Grade	Institute	Score/Year
PG: Master of Computer Application	LJICA	8.85/10 CGPA [2026]
Bachelor: Bachelor of Computer Application	LIPS - JODHPUR	7.3/10 CGPA [2024]

TECHNICAL SKILLS

- **Testing Skills:** Manual Testing, Automation Testing, SDLC & STLC, Bug Reporting, Test Case Design
- **Programming:** C, C++, Java, SQL, Javascript
- **Web Development:** HTML, CSS, ASP.Net
- **Database & Tools:** MySQL, Git and GitHub, JIRA, Selenium

GENERAL SKILLS

- Leadership
- Effective Communication
- Time Management

Experience and Volunteering

Trainee Software Test Engineer
KiwiQA Services Pvt Ltd | Jan 2026 – Present

- Performed manual testing on web applications
- Wrote test cases and test scenarios
- Reported bugs using defect tracking tools

Training and Placement Coordinator
LJ University – Ahmedabad | February 2025 – January 2026

- Managed student placement data and coordinated campus drives.
- Acted as liaison between students, faculty, and recruiters.
- Guided students in interview preparation and career planning.
- Coordinated with 100+ companies for campus recruitment activities.

PROJECTS

QA360 – SaaS Platform

- Developed and deployed a QA automation SaaS platform with a React dashboard frontend and Node.js/Express backend.
- Built Playwright-based automated tests for functional and end-to-end testing of websites.

QuickBid – Auction Web Application (Development + Testing)

- Developed and tested an online bidding application.
- Created test plan, test scenarios, and test cases.
- Executed functional and regression testing.
- Logged defects and validated fixes.

Note Bank Application:

- Built a digital note-sharing app for college students with secure login and note access.
- Performed functional testing and validation checks.

Placement Cell Management:

- Developed a web-based system to streamline student–recruiter interactions.
- Implemented modules for student registration, job postings, and recruiter management.
